

# BUILD YOUR OWN BATMOBILE COSTUME

Get ready to make your own Batmobile costume! Gather some supplies and follow these simple steps below!

## SUPPLIES:

Cardboard box (big enough for your child to sit in)

Pencil

Ruler or Measuring Tape

Pen Knife or Scissors

Glue (Preferably) or Masking Tape

Duct tape

Blue, yellow, red, black, and white paint

Paint brushes

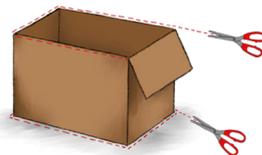

## PART 1: CAR BASE

01

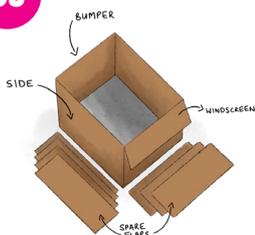

Find a rectangular cardboard box that your child can sit in to make sure they can fit in their Batmobile.

02

Cut off all the flaps on the top and bottom of the box, leaving one short flap on the top.

03

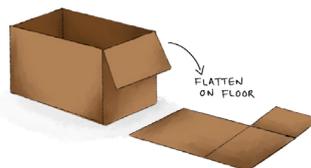

Put aside removed flaps. The attached top flap signals the front of your Batmobile as that will subsequently be the windscreen.

04

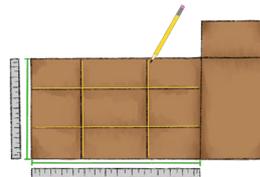

Hold the box diagonally along its corners and pull it to flatten.

05

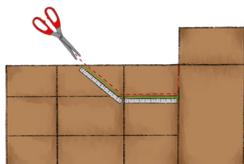

Place the box flat on the ground with one of the long sides facing you.

06

Use a ruler to measure the length and height of the side of the box then draw out 9 equal boxes.

07

Draw a line from the top center to the bottom right end of the top right box. Cut off the area you have drawn out. Repeat on the other side!

08

Keep both cutouts for use later.

09

Bend the front of the cardboard with the top flap to fit the shape that you've previously cut out.

10

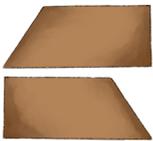

Glue/tape the front of the cardboard to the side of the cardboard on both sides to form the hood of your Batmobile. Do not glue/tape the top flap to the side of the cardboard.

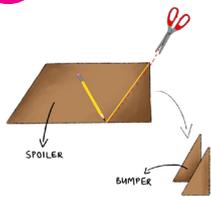

**PART 2:  
CAR SPOILER & REAR BUMPER**

11

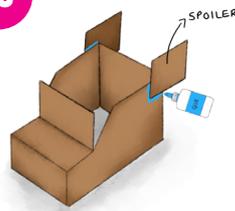

To create the spoiler and bumper, get the 2 cutouts you made from creating the hood of your Batmobile.

12

Draw a line on the left side of the cutout to form a smaller right-angled triangle and cut it out.

13

Use the bigger cutout (spoiler) and glue/tape it to the top of the back of the Batmobile. Repeat on the other side, ensuring both sides are parallel.

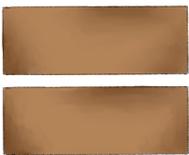

14

Glue/tape the smaller cut-out (bumper) on the back bottom of the Batmobile, both parallel to each other as well.

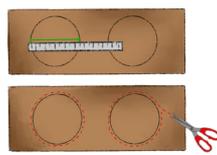

**PART 3:  
WHEELS**

15

To create the wheels, retrieve 2 flaps that you've cut out from the box previously.

16

Draw 4 circles on them with either 10cm or 15cm circumference (depending on the size of your car base).

17

Draw out the design above on all 4 wheels or print out the design on the template in the template section below.

18

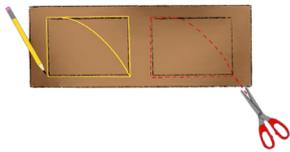

Glue/tape the wheels on the bottom of your car, ensuring both sides are parallel.

**PART 4:  
BAM'S EARS**

19

Take one of the leftover flaps and draw out two rectangles of the same sizes. Draw a curve diagonally and cut out the shapes. These will form Bam's 'ears'.

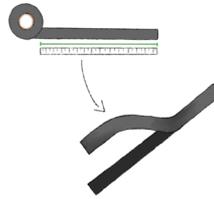

20

Glue/tape it on the top back of the Batmobile, near the spoiler.

**PART 5:  
STRAPS**

21

To create the strap, layer two 1-m stretches of duct tape together, sticky sides in, to create a strap. Repeat to make a second strap.

22

Glue/tape each strap to the inside back of the Batmobile.

**PART 6:  
PAINT YOUR OWN BATMOBILE!**

23

With your child inside, bring the straps over their shoulders and glue/tape to the inside front.

24

To the most fun part of the experience. Draw and paint on your favorite expressions of Bam.

25

Pick a set of eyes and a mouth from above to paint onto the front of your Batmobile or print and paste it on from the template below.

26

Paint the side according to the picture above!

27

Paint the back according to the picture above! Alternatively, you can print the design out from the template below and paste it on to paint.

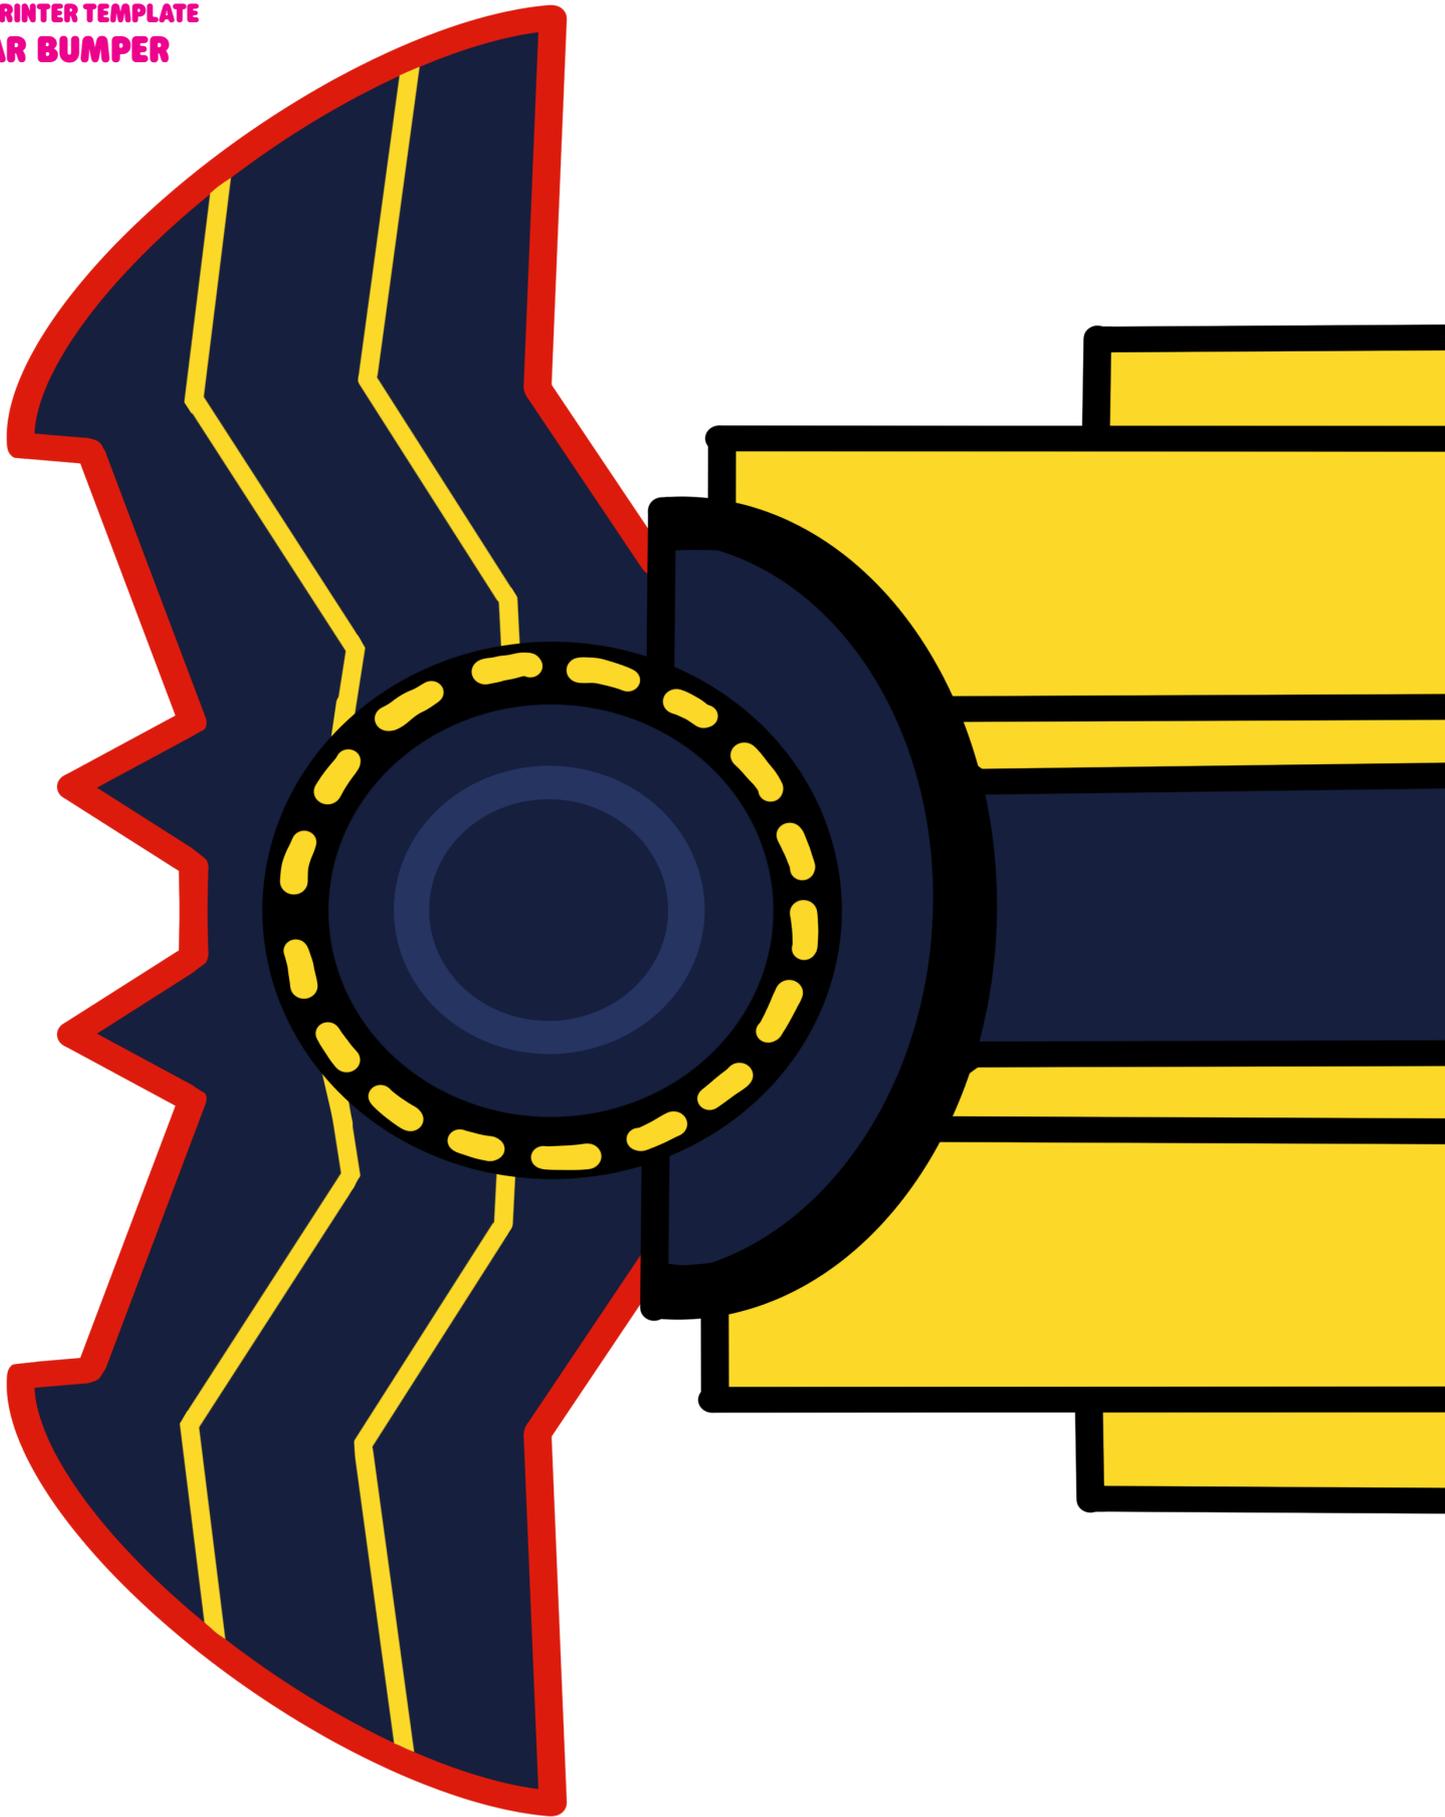

**THE END CREATION:**

Great job, you've created your own Batmobile, Bam from Batwheels!
